WORK EXPERIENCE

FULL-STACK WEB DEVELOPER

Freelance | September 2020 - Present

- Featured Projects:
 - Parc-It
 - A yelp style app designed to make finding parks near you that are safe, clean and have the amenities you're looking for. Parc-It is a React app that was made in conjunction with 5 of my classmates. My major contributions was the team page, where users can create teams and save them to a MongoDB database, being able to add friends or family who can check in as soon as they've arrived at their chosen park. I also focused my work on the folder structure, as well as the overall styling of the project
